INFORMATION

31.5” PCAP 10pt touchscreen PC with Android, PoE technology and iiSignage²

The ProLite TW3226AS-B3P is a smart and intuitive 31.5" Touch panel PC, designed for high-traffic environments such as meeting rooms, info points, or hospitality spaces. Its 10-point PCAP touch technology ensures smooth and precise interaction. Powered by Android 14, and equipped with powerful hardware, it allows easy installation of apps directly on the device - making it a all-in-one solution. Thanks to Power over Ethernet (PoE), both power and data are delivered through a single cable, simplifying installation and reducing additional cables.

With a built-in quad microphone and 5W speakers, the TW3226AS-B3P delivers seamless, modern interaction in any smart space. Additionally, it integrates effortlessly with iiSignage², iiyama’s Content Management System (CMS), giving you full control over your messages and advertising, in landscape portrait and face-up position.

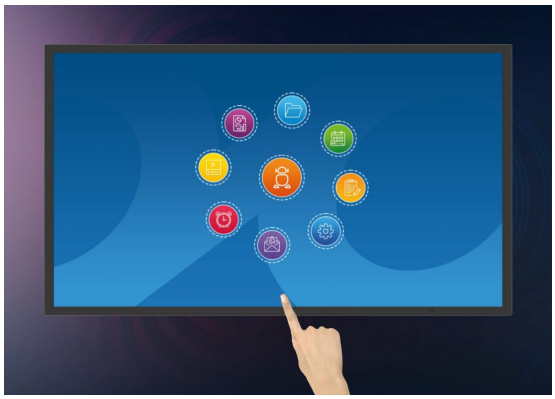

Elegant Design meets Smooth Interaction

Elegant by design, vibrant in every detail and smooth response to every touch. With its slim, modern appearance and crisp, vivid colors, it creates an engaging user experience while blending naturally into a wide range of environments. Its flexible, app-ready platform also makes it easy to tailor the display to different applications, from retail and information points to showrooms, hospitality and interactive installations.

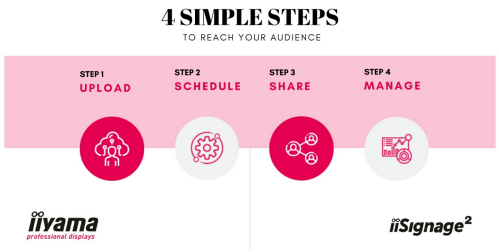

Connectivity

The RJ45 (LAN) connector supporting Power over Ethernet technology (POE) allows to provide both data connection and power by a single cable, which simplifies installation in areas where many cables would interfere with the environment.

Android OS

Thanks to Android OS, you can easily customize the display to your needs by installing applications directly to it.

iiSignage²

iiSignage² is our digital signage content management platform to easily show and control your content and to manage your displays in a secure way. The Content Management System (CMS) gives you total control of your messaging and advertising remotely and safely.
